

Amazing Animals

Animals are living organisms that exist in every part of the world. They vary in size, shape, behavior, and habitat. Some animals live on land, others in water, and many can fly in the sky. This document introduces a few interesting animal groups and facts about them.

Lion

Lions are known as the kings of the jungle. They live in groups called prides and are powerful predators.

Elephant

Elephants are the largest land animals on Earth. They are intelligent and have excellent memory.

Dolphin

Dolphins are marine mammals famous for their intelligence and playful behavior.

Eagle

Eagles are strong birds of prey with excellent eyesight used for hunting.

Penguin

Penguins are flightless birds that live mostly in the Southern Hemisphere and are great swimmers.

Animal Summary Table

Animal	Habitat	Special Feature
Lion	Grasslands	Strong predator
Elephant	Forests/Savannas	Large memory
Dolphin	Ocean	Highly intelligent
Eagle	Mountains/Forests	Sharp eyesight
Penguin	Cold regions	Excellent swimmer
